

**CONSENTIA**  
RAW DATA. REFINED RESULTS.

# SECURE DATA ENTRY

Accurate, efficient data entry you can trust

We carefully enter your documents, ensuring every record is complete, consistent, and handled securely.

## OUR PRACTICES

### Accurate Entry and Verification

We carefully enter your documents and use double-entry verification in addition to a quality assurance review from different clerks.

### Secure Handling

Information is protected at every stage of the process using strict physical security and site access so you can trust data is handled safely.

### Competitive & Transparent Pricing

We offer competitive pricing options based on the volume and complexity of your project, and maintain transparent communication with no hidden fees.

## THE PAYOFF

### Flexible Operational Aid

When data piles up, you don't need to recruit or manage more staff. You get extra hands only when the work exists and can scale back when it doesn't.

### Consistent Data Everytime

Instead of people entering information in different ways, everything follows the same rules. The result is data that looks the same and doesn't need fixing.

### Fewer Errors, Less Re-work

Data entry is handled by people whose only job is accuracy. Checks are built into the process, so mistakes are caught early reducing later issues.
