# NO FILE LEFT BEHIND™

One Plan. All Your Files. Fully Digitized.

No File Left Behind™ is a phased document scanning program that digitizes your entire paper archive—without upfront bulk costs or temporary storage fees.

THE CONCEPT

Complete End-to-End Digitization

A structured approach to digitizing everything — active files, backfiles, and forgotten records — so nothing is left sitting in boxes or cabinets.

Finish the Job, Not Stall Halfway

Designed to eliminate paper entirely over time, rather than digitizing a portion and letting paper creep back into operations.

Built Around Operational Constraints

Scanning is completed in periodic batches according to your schedule and operations allowing you to control costs while making steady progress.

HOW THIS HELPS YOU

Eliminate Paper & Reclaim Space

Fully digitize your entire archive and replace filing cabinets and storage boxes with usable office or operational space.

Predictable Costs, No Surprises

Move forward with a controlled monthly budget. No lump sums, hidden fees, or ongoing storage charges.

Faster Access with Lower Risk

Find records instantly while reducing delays, improving audit readiness, and minimizing risks tied to paper.

HOW IT WORKS

We Pick Up Your Files
Your full backlog is collected at once, instantly removing paper from your space.

Secure Storage & Preparation
Records are stored securely and are organized and prepared for digitization.

Scheduled Scanning
Files are scanned in agreed-upon monthly phases that align with your budget and timeline.

Searchable Digital Delivery
Digitized files are organized, indexed, and delivered for easy access and retrieval.

No File Left Behind™ turns digitization from a project into a permanent solution.
